

MyBillReview™ Medical Bill Review Software PRODUCT SHEET

Powerful, Easy-to-Use, and Affordable Software for Medical Bill Review

Bill Review Simplified

How do you ensure that your company is obtaining accurate medical bill review information?

CompStar Systems, Inc. introduces **MyBillReview™**, a first-of-its-kind product which offers the power and features of a much larger application and packages them into an affordable, easy-to-use solution suitable for any size business. It's bill review simplified.

Simply Powerful

MyBillReview™ has made obtaining extremely accurate medical bill reviews a snap. The user interface offers a step-wise approach to the bill coding process, giving you clear instructions on what data is required and where to find it on your medical bill. If you need additional assistance, you have a multitude of options to help you including technical support and detailed online help.

Accuracy

MyBillReview™'s comprehensive bill review engine re-prices according to data-driven schedules and rules, guaranteeing that bills are re-priced appropriately. Additionally, it applies a variety of checks to ensure that duplicate bills are detected and appropriately handled.

References

MyBillReview™ features a broad references section allowing you to lookup a wide array of information including state-specific fee schedule values, Medicare fee schedule values, CCI edit information, etc.

Low Total Cost of Ownership

Performance is a success driver only if accompanied with affordability. **MyBillReview™** is a browser-based solution that is available in a hosted environment. Maintenance is seamless. Our hosted solution means that no local software installation is necessary – all you need is a compatible web browser, and it virtually eliminates the need for application administrators. Web-based means each user can access the application where internet access is available.

Security

Security is of paramount concern especially when data travels over the internet. **MyBillReview™** employs Secure Sockets Layer (SSL) to transmit data securely over the public internet. **MyBillReview™**'s database sits behind firewalls and utilizes strict security measures. Each **MyBillReview™** page is also secured and available only to authorized users.

MyBillReview™ Medical Bill Review Software
